EXPERIENCE

Apprentice, Johnson Atelier (Hamilton, NJ) 5/06 - 8/06

Utilized handheld 3D laser scanner to digitally enlarge artists' maquettes

Operated 5-axis milling machine

Prepped artists' sculptures for casting in bronze

Assisted in the creation of dozens of foam, steel, and bronze sculptures

Fabricator, SKS Metalworks

(Redhook Brooklyn, NY) 4/06 - 7/06

Machined architectural components from raw stock

Worked with steel and stainless steel using industry-standard equipment

Fabricator/Welder, Official LLC

(Williamsburg Brooklyn, NY) 3/05 - 5/05

Welded various steel and stainless steel structures, including tables and staircases

Worked with wood in both architectural and artistic applications

Sculptor/Fabricator, School of Visual Arts

(New York, NY) 1/04 - present

Concentricity 2005 - present

Conceived original designs for interactive light sculpture series

Fabricated all components from scratch, utilizing aluminum, stainless steel, acrylic, and other materials

Designed custom circuit boards

Installed electrical components, including LEDs, resistors, capacitors, reed switches and relays

Untitled 2007

Hand-forged curved shapes out of cold-rolled steel

Assembled and welded components and polished surface

EDUCATION

School of Visual Arts, Fine Art/Sculpture Major (New York, NY) 1/04 - present
